NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

COMPARISON OF NORTH KOREAN, CHINESE MASS LINES

Seoul PUKHAN in Korean Mar 82 pp 200-211

[Article by Chong Se-hyon, Ph D in Political Science, staff research officer, Peaceful Unification Research Institute: "Communist Chinese and North Korean Mass Lines: With Emphasis on Comparison of the Formative Backgrounds and Ideological Structures."]

[Text] I. Introduction

It is a prevailing theory that communism in Asia today has originated from Chinese Communism.¹ Chinese Communism was formed with Mao Zedong's ideology as its core, it seems. The work and statements of Kim Il-song of North Korea and the documents that deal with these, in view of the fact that he is exercising rigorous control over the ideology and policies of the party, enable us to find with ease the identity or similarity between Communist China and North Korea or "the Chinese Communist Party [CCP]" and "the Korean Workers Party [KWP]" in terms of the policies of their parties.²

In many instances North Korea has imitated Communist China. One of these is that of the mass line, with which this paper will deal. Having imported the mass line from Communist China, North Korea consistently followed them in the fields of politics, economy, social and cultural affairs, and military affairs and thereby attempted to maintain its political legitimacy. It made the best use of them by evoking them as a justification for the mobilization of labor in socialist construction. The mass line in fact served as fundamental class policy in pushing the campaign of remaking the ideology of the populace of North Korea. The issue of the mass line thus may be approached and analyzed in terms of variety of arenas and angles. In this paper, however, on the basis of the conception that the mass line served as a justification for and means of labor mobilization--which was the motive for importing the mass line from Communist China--the characteristics of the mass line will be dealt with in terms of their formative backgrounds and ideological structures.

It is a deformed theory of modernization that modernization and industrialization designed to overcome backwardness will be achieved by means of the quantity of labor instead of technology and capital. In this context, in what kind of social and economic mechanism have the mass line, which represents an ideologically existing method of labor mobilization, developed on Communist

China and North Korea? What are the differences in logical conceptions? And with what developmental background have the differences occurred? In this paper, these questions will be discussed. Accordingly, I would like to point out here that this paper will not deal with the method of launching actual mass activities.

2. The Formative Process of the Concept of "Mass Line"

The mass line has been a well-known method of guiding the masses of the CCP since the Yenan period.³ When they arrived at Yenan after "the Long March," Mao Zedong and his followers could not help recognizing the masses more than [those represented by] elitism, which was a fundamental theory of organizing a communist party; they were faced with a situation in which even the maintenance of their power itself would be jeopardized, if the power and participation of the masses were not emphasized. Under such circumstances, Mao Zedong said in a paper entitled "On Some Problems of Leadership Methods," at a meeting of the Central Committee of the CCP, held in June 1943, that "In launching all the actual activities of the party, the correct leadership must be exercised always in the form of 'from the masses' and 'to the masses.' In other words, we must assemble the views of the masses (views which are sparse and not systematic), return to the masses, propagate and paraphrase them among the masses to make their views their own, and let them hold fast to them and put their views into practice; and thereby we must test the correctness of their views through practices. After doing so, we must gather the views of the masses and return to them again."⁴

In the above quotation, we can find the fundamental principle of the mass line--"to come out of the masses and go back into the masses again." Another principle of the mass line is "to go among the masses and learn from them." Mao Zedong explains this as follows:

"We must go among the masses and learn from them. We must synthesize experiences of the masses and organize into a systematic whole with a methodology. Then we must let the masses know about this and urge them to put it into practice; and, at the same time, we must solve the problems of the masses so that they may enjoy liberation and happiness."⁵

These two principles cited above have served as standards for the principles that have governed the organization of the CCP since 1943. Namely, cadres of the CCP implemented through to the end these two principles set forth in Mao Zedong's mass policies, and thereby turned their relationship with the masses to one favorable to them. By doing so, they tried to evoke the masses' support of and participation in the causes of the CCP.⁶

The mass policies thus adopted as the organization policy of the CCP then underwent some conceptional development launched by the cadres of the CCP.

In his report on the draft proposal for an amendment to the constitution of the party which was submitted to the Seventh Congress (April 1945) of the CCP, Liu Shaoqi defined the mass line as class policies, organization policies, and political policies.⁷ Deng Xiaoping, varying from Liu Shaoqi's trinity-like

mass line, said in his report on the draft proposal for an amendment to the constitution of the party which was submitted to the Eighth Congress (1956) of the CCP: firstly, while "serving the people," we must "set forth the direction of fight," "rely on the people," and "enjoy and take pains together with the masses"; but we "must not rule the masses." Secondly, Deng Xiaoping urged that we must "systematize" "the sparse and unsystematic" ideas, that we must test them on the spot in order to achieve "accuracy" "vividness" and "richness."⁸

Through these observations cited above, we came to know: that the mass line was first adopted as an organization policy for the cause of survival and growth of the CCP; that they took the characteristics of antibureaucracy and a policy science during the periods of Liu Shaoqi and Deng Xiaoping; that they intensified the direct contact between the masses and the party cadres and thereby minimized antagonism that is likely to exist between the party and the masses and maximized the effectiveness of mobilization; and that the mass policies represent a leadership that causes all these.

3. Pushing Rapid Modernization and the Mass line

World countries have sought economic development and the systematization of political beliefs since the Industrial Revolution of Great Britain and the great revolution of France. Newly born nations, in particular, hoped to attain wealth and economic power which would enable them to expand reproduction when their national economy achieved an industrial and technological foundation; and, politically, they exerted efforts to form racial unity through an effective political system.

Communist China tried to effect a "Great Leap" through the Second 5-Year Plan which started in 1958. The method of launching the Great Leap Campaign was by means of evoking competition among the masses to increase production enormously and improve labor organization and the production process. To bring about a "Great Leap" in the socialist construction is aimed at nothing but the achievement of national goals of a newly born nation.

At any rate, whether or not the "Great Leap" Campaign thus launched would be effectively implemented, ultimately depended upon the mobilization and organization of the masses. Therefore, Liu Shaoqi said: "The overall policies of socialist construction of the party are [aimed at] the application and development of the party's mass line."⁹ The CCP, mobilizing the masses under the slogan of "Great Leap" in order to bring about a flying-jump development of economy, had to resort to every means to squeeze the resources of the masses to the maximum. Consequently, it began to develop the theory of linking the centralized leadership system, which was based on the communist principle of leadership, with the mass movement. At the first session of the 2d National People's Congress (April 1959), Zhou Enlai said:

"As shown in the experiences gained in recent years, especially those of 1958, the most fundamental guarantee for the achievement of industrial plans lies in the thorough implementation of the mass policies in the work, that is, to link the centralized leadership system with the active mass movement."¹⁰

Furthermore, Zhou Enlai emphasized that, in order to effect this linking, it is imperative that the cadres of the lowest units--fundamental units and the active elements brought up from among the masses should also take part in the important meetings convened by business enterprises, and that their views should be fully reflected in any important decisions made at those meetings. He then cited a number of concrete methods of linking the centralized leadership system with the mass movement as follows: "the party secretary takes the lead principle," "the experimental group labor of leading cadres," "to convene on-the-spot meetings," "the organization of study trips and the mass evaluation of the work achievement," "awarding the Red Flag to [those who achieved] advanced level of technology," and "the workers' participation in the management."

Communist China's methods of implementing the mass line employed in the Great Leap Movement represent, in a nutshell, the embodiment of Mao Zedong's revolutionary mass ideology, which romantically trusts "the endless creative resources of the masses" and "the endless zeal of the masses."¹¹

Soon after Communist China gave impetus to "the Great Leap" Movement in the summer of 1958, North Korea began launching the so-called "Ch'ollima" Movement in March 1959. The interrelationship between the Great Leap Movement and the Ch'ollima Movement is an issue that should be studied through research from now on; and these two, above all, have too many similarities between them.¹² They are similar in their revolutionary enthusiasm and zeal and in what they are aiming at. They are aiming at an enormous production increase, maximal mobilization of personnel and material resources, and a rapid mobilization. However, they were different from each other in their methods.

North Korea tends to deny an interrelationship between the Ch'ollima Movement and the Great Leap Movement. North Korea claims that the Ch'ollima Movement began when a meeting of the party Central Committee was held in December 1956. In other words, it is claimed that Kim Il-song, at the close of the meeting, put out the slogan "Let Us Run Like a Flying Horse [Ch'ollima]!" and thereby made all workers rise up for the struggle of pushing socialist construction.¹³ However, this slogan of Kim Il-song was nothing but a political appeal for launching socialist competition. The Ch'ollima Movement began spreading all over North Korea as a mass movement after Kim Il-song instructed workers of an iron works in South P'yongan Province in February 1959 to organize "Ch'ollima work teams."

Kim Il-song began to emphasize the importance of the masses' role in pushing socialist construction. The reason for this is, needless to debate, that the implementation of ambitious economic plans under such circumstances as in North Korea where technology and resources are scarce, made it imperative, as it did in Communist China, that wisdom, revolutionary zeal, and the endless creative power of the masses should be praised and the masses' labor resources should be mobilized maximally.

At any rate, from 1960 on, Kim Il-song restructured his coarse views regarding the method of launching the mass movement by modeling them after Mao Zedong's method of the mass line; and he began to publicize it as the revolutionary mass line created by himself. However, it is a fact, which cannot be concealed, that Kim Il-song imitated Mao Zedong's definition of mass policies. In

December 1964, Kim Il-song said as follows: "The cadres...go among the masses, organize them so that the party policies may be implemented correctly, identify pending problems, listen to the masses' opinions, analyze them after bringing them back to the upper [echelon], and go back among the masses with the party's new methods and measures--the very doing so is the mass line."¹⁴

Furthermore, in the process of pushing the mass line, the phrase "the political work gets priority" was often heard in North Korea. This phrase was the translation of the very phrase "politics gets priority" [in Chinese] which Communist China used during the Great Leap Movement period. In December 1964, Kim Il-song emphasized "the work method by means of mass policies," that is, that the work method of mobilizing the masses by giving priority to the mass policies is a thing that is needed in revolutionary struggle just as much as in economic construction.¹⁵ He then censured economic cadres because they simply indulged themselves in economic technology and practices and neglected political work. According to Kim Il-song, in order to make the masses display their revolutionary zeal and creative resources, the shortest cut is "to give priority to politics."

Since the principle of giving priority to policies was an imitation of Communist China, North Korea could not help imitating Communist China also in "attacking the principle of regarding technology as a secret"--a measure which worked side by side with the principle of giving priority to politics. Communist Chinese authorities were launching a major attack against specialists because they took pride of their scientific knowledge and technology and neglected the masses from whom, they claimed, nothing could be learned.¹⁶ From August 1958 on--around the same time as in Communist China--in North Korea also, specialists began to be criticized for rejecting the party leadership and taking pride of their technology. Kim Il-song censured technicians for their attitude of attaching importance to machines; and branded it as an attitude of disliking innovation and progress; he warned scientists too by telling them not to think that they were the only people who developed science and technology.¹⁷

The attack on the principle of regarding technology as a secret is a fruition of the principle of giving priority to politics; and, it may be said, this is again related with the mass policies.

Giving priority to politics while attacking the principle of regarding technology as a secret--and evoking the revolutionary zeal of the masses and employing it as a motive power for economic construction--may be regarded as a backward method at one stage of economic development of a country which has adopted the socialist economic system. In an advanced communist country which now has reached the stage where luxury goods are being produced, the economic plans are mapped and implemented in such a direction as to improve the quality of goods. This is possible through the use of intensive capital production and intensive technology production. The development of technology and the improvement of quality incite profit motives--this is possible only through labor mobilization with material incentives. On the contrary, in an underdeveloped communist country faced with "the problem of quantitative production"--the problem of producing more daily necessities than luxury goods--the use of intensive capital production or intensive technology production would

be a premature. At the stage where a great quantity of daily necessities must be produced through the use of intensive labor production, the quantity rather than the quality of labor is in question; and, in such a situation, the method of exciting ideologically, which is a way of effectively accumulating quantitative labor, is employed.

The general trend was as stated above. Communist China and North Korea were Asian communist countries which faced with the problem of famine. Therefore, for them the ideologically exciting mobilization of labor was indispensable in the second half of the 1950's and early 1960's. In other words, it was logical for Communist China and North Korea spontaneously to use only the available productive force [under the circumstances in which] the production relationship is fixed and to employ the method of increasing productive force by giving priority to politics and evoking the ideologically exciting mobilization of labor force. In short, the adoption of mass policies was inevitable for Communist China and North Korea due to their underdevelopment.

The internal circumstances of Communist China and North Korea under which they adopted mass policies as a method of labor mobilization have been reviewed above--their stage of economic and social development. The international situation and the situation that prevailed in the Communist bloc at that time were also strongly conducive to the adoption of mass policies.

After establishing its government in 1949, Communist China pushed its industrialization and collectivization on the basis of the Soviet Union's experiences. Since the Soviet Union and the East European communist countries consistently rendered their economic and technical assistance to Communist China, Communist China was able to reduce much of its burden of capital accumulation and technical reformation. North Korea, too, received technical assistance and a great amount of [economic] assistance which amounted to 40 percent of its annual revenue from the Soviet Union and other communist countries during the period of "the postwar 3 year rehabilitation plan" following the Korean War.

However, from 1958 on, the economic situations in Communist China and North Korea underwent fundamental changes. As the Sino-Soviet disputes got worse, the Soviet Union conspicuously reduced its economic aid to Communist China and withdrew its technicians from China. An external cause of Mao Zedong's decision to speed up the socialist construction through the adoption of mass policies is to be found here. In the midst of the Sino-Soviet disputes, as soon as North Korea appeared to side with Communist China, East European countries and the Soviet Union turned their cold shoulders to North Korea.

At the same time after the Soviet Union and East European countries economically and politically turned cold shoulders to Communist China and North Korea, Communist China and North Korea, those countries, which were structurally backward because of scanty resources, shortage of capital and technology, and backwardness in management methods, put forward the slogan of self-reliance and attempted to adopt mass policies to push rapid modernization. But, while they were doing so, the Sino-Soviet disputes became greatly aggravated and thus caused the discontinuation of the capital and technical assistance from the Soviet Union and East European countries. And such changes in the international situation gave rise to further intensification of the ideologically incited mobilization of labor through the mass line.

4. "Mass Line from Below" and "Mass Line from Above"

Historically, China and Korea had traditions of having been ruled by the Confucian bureaucratic system. In this system, the connection between the central and local [governments] was not close; and therefore the orders or directives of the central government usually implemented faithfully. This was because the government officials formed factions under the bureaucratic system and laid stumbling blocks in the way of implementing the orders or directives of the central government.

Such a work style of government officials with this deep-rooted history remained the same even after China and North Korea were communized; and it served as a detrimental factor for the so-called swift "socialist construction" and "revolution." The adoption of the mass line as policies of the party was aimed at: eliminating such a persistent "disease," filling the "gap" between the central and local governments, establishing a new system of order, and seeing to it that the orders or directives of the central government would be effectively implemented in the administrative system.¹⁸

Although Communist China and North Korea adopted the mass line as the party's method of leading the masses in an effort to resolve [problems arising from] similar traditions and styles of work, they came to differ greatly from each other in the process of putting their policies into practice. While the mass line of Communist China tended to go in the direction of inciting the initiative and participation of the masses, North Korea went along in the direction of ensuring the obedience by the masses.¹⁹

In order to conduct a comparative analysis of the theoretical structure of the mass line of Communist China and that of North Korea, it is unavoidable to deal with some mutually contradictory theories governing the mass line of Mao Zedong. As Stuart Schram pointed out: Is Mao Zedong a born Leninist? Is it possible to conclude that Mao Zedong's "wide-range organization of masses" was proved to be a contribution to the communist movement? Or was he an idealist who denied the unique role of the advance party in a revolution, and who believed in the masses actions taken on their own will? These questions are still very much debatable. As pointed out by Harry Harding, if one asserts that the mass line of Communist China were nothing but a theory of justification²⁰ which is aimed at positing the masses' participation in order to evoke their obedience in the process of implementing the policies on a full-fledged scale, the differences between the mass line of Communist China and that of North Korea will not be exposed at all.

However, if one takes the approach of recognizing the non-Leninistic aspect of Mao Zedong's ideology and regards as important its populist characteristics the theoretic structure of the mass line of Communist China will become essentially different from that of North Korea. In short, in order to set forth the differences in the theoretical structures of the two countries' mass lines, it is imperative to examine the background of the formation of ideologies of those who adopted the mass line and the Marxist-Leninist intensity of their ideologies.

The fundamental difference between the ideology of Mao Zedong and that of Kim Il-song is above all to be found in their stands regarding the question "who has the revolutionary consciousness, an incentive for the 'revolutionary' 'socialist construction'?" In other words, judging from the viewpoint of populism, such as Mao Zedong's, the role of the advance party is simply to incite and evoke the "revolutionary consciousness" that is potentially held by the masses. However, judging from the orthodox Leninist viewpoint, "the revolutionary consciousness" is potentially held by the administrator; and the advance activist will expose the consciousness and indoctrinate the minds of the masses with it. Therefore, judging from the Leninistic point of view, Mao Zedong's populism is wide open to the criticism that it has a wrong idea of the essential character of the advance party.

Meanwhile, Mao Zedong asserted that the peasants, who are not the party, are the vanguard for overthrowing the feudal forces, on the basis of his own consciousness of the fundamental problems of the society of China. Mao Zedong's conviction regarding the creative power and the initiatives of the peasants of Communist China does have something to do with his skepticism about the pride of the elitists, including the communist party; and this became the theoretical background of "the send back [the cadres] to the countryside" movement and "send [the youth] back to their home countryside" movement.²¹

However, Kim Il-song places his hope on the role of party cadres, as long as the question of "revolutionary consciousness" is concerned. In the speeches of Kim Il-song and his selected works, it is rather hard to find any expressions of skepticism over the role of the party cadres, such as those of Mao Zedong. Much less conceivable are such things as the party cadres' being judged by the masses. Thus one can find here the difference between the theoretical structures of the mass lines of the two countries.

According to Kim Il-song's view of the masses, the revolutionary consciousness is not potentially held by the masses, but will be included in them from outside. Therefore, according to his views, in the stage of setting forth problems to map out policies, the masses can never lead or teach the party cadres; but, in the second stage of examining [the situation] the masses can give information about local characteristics or agricultural technology to the party cadres. Thus, in North Korea, only after the selection of issues for mapping out policies is done in the party, can the contacts between the party cadres and the masses begin with explanations and paraphrasing the problems.

On the other hand, the method of activities of the mass line of Communist China in accordance with Mao Zedong's views of the masses is different from this. In other words, because it is assumed that the revolutionary consciousness is potentially held by the masses, and because the role of the party cadres is underestimated accordingly, in the case of Communist China, the stage of setting forth problems starts at the collection of information from the masses. Following this stage, the party puts the masses' views together to map out policies of a general nature; and then the party cadres go among the masses to paraphrase and publicize the policies.²²

Such differences in the methods of activities characterize the theoretical structure of the mass lines: namely, Communist China's mass line may be called a "mass line from below," while North Korea's mass line may be called a "mass line from above."

Then where do these differences come from? They may be caused by various factors; but, by and large, first, by the type of power held by the ruler; second, by the position of the person who holds the highest authority in the party; third, by the intensity of remnants of the bureaucratic system; and, fourth, by the difference in the areal size of territory.

It is well-known that Mao Zedong and the CCP mobilized, in their protracted process of "revolution," the masses who were centered around the peasants to seize the ruling power. We can often find instances of attaching importance to the peasants and of praising the ability of the masses in Mao Zedong's formal addresses and speeches. When we analyze the process in which Mao Zedong emerged as a leader in this context, we may understand the reasons more clearly. On the other hand, it is well-known that Kim Il-song and the North Korean Communist group seized their power through "the feeding down type" communization, which is not an independent process of communization. Furthermore, they have never evoked the mass movement that is based on the rural villages as the fundamental motive force for communization, either. Kim Il-song established his ruling power in the manner of "coming down from above" under the aegis of the military forces of the Soviet Union. These differences made in their modes of seizing power became major causes of differences in the outlooks toward the masses of Mao Zedong and Kim Il-song. And this again, it can be said, affected the theoretical structure of their mass lines.²³

There is no need to discuss for verification the fact that the process of Mao Zedong's becoming the top leader of the CCP was not his one-man show within the party. Furthermore, even after he seized power in the party, he was not an absolute authority in the party. In other words, as pointed out by Scalapino, the CCP had the characteristics of the minority autocratic system rather than the one-man autocratic system, such as that of North Korea.²⁴ Prior to the seizure of the whole country of China, the Moscow influences were laying stumbling blocks in Mao's way of seizing the ruling power; and, even after he seized the power, his views were faced with major resistances in the process of discussing and mapping policies in the party. Even the launching of the Great Leap Movement was not always smooth, while the mass policies were being implemented to effect a rapid leap and industrialization.²⁵

Meanwhile, Kim Il-song's circumstances were different from this. After seizing the power under the aegis of the Soviet military forces, what he began to launch was a purge of political enemies. Thus by 1958, the purge of opposing elements, including the Soviet faction, the domestic faction, and Yanan faction, was completed; and the foundation for Kim Il-song's unique autocratic system was firmly laid.²⁶ The time when the foundation for his unique system was laid coincided with the time when he set forth the mass line along with the Ch'ollima movement. This fact, it may be proposed, serves as a major factor in characterizing North Korea's mass line to the effect that they would be characterized as "the mass line from above" of "the feeding from above" type.

It is already cited above that both China and Korea are enjoying the traditions of Confucian bureaucracy. Yet Korea is different from China in that Korea has a history of having been a full-fledged colony of Japan.²⁷ Such a history made

the Koreans harbor deep in their mind distrust and mistrust toward the government; and such a trend gave rise to an extreme bureaucracy and a formalism on the part of the ruling class. Where the extreme bureaucracy and the formalism manifested as a negative obedience, are mixing with each other, the administration is to be exercised in line with the trend of: transmitting the will above to below; directing, ordering, and giving priority to punishment-first-ism. Accordingly, the creativeness of the masses is not to be displayed. Cooperation between organizations is hardly to be expected; and frustration and incompetence make the administration inefficient.²⁸

Kim Il-song once pointed out that such residues of the rule of Japanese imperialism still remain.²⁹ The bureaucracy and formalism prevailing in North Korean society became the factors that made the leading strata of the party employ the mass activities by means of the method of "from above" or "a come down type" in order to implement the party policies.

It is unnecessary to say that China's territory is large and its population is tremendously large. Because of such circumstances, there were few central governments which could have centralized control of the whole territory of China. In other words, throughout the history of China, the control of the central government of China was rather weak compared to that of the neighboring minor countries. To express in another way, China's central government always had to keep in its mind the problem of the participation by the "from the below" forces. On the other hand, in the case of the history of Korea, in most cases, a single dynasty--the three Han or Three Kingdom period was an exception--and its central government exercised a centralized control. The reason that orders or directives of the central government could be transmitted to the territorial areas under its control in a short period of time is attributed to the fact that the territorial area is comparatively small. Furthermore, the area under the control of North Korea is no more than a half of the Korean Peninsula. Therefore, it may be proposed that the small territory of North Korea served as a factor that made the control of the central government and the party comparatively stronger. And, judging on the basis of the proposition that the style of activities of policies and government tends to become expediency-oriented within the range where circumstances permit, it would be a matter-of-fact conclusion that the mass line of North Korea was characterized as "the mass line set forth from above." Thus, in North Korea, "the mass line from below" was not needed; and, if it had existed, it might have been troublesome for North Korea to handle the situation.

6. Conclusion

In the above, I reviewed the formative background and the development of the mass lines of Communist China and North Korea as well as the ideological structure of their mass line as they were employed as strategies for modernization.

The mass lines were developed [in the two countries] in a similar social and economic developmental stage as well as in a similar international environment with similar motives and purposes in their minds. However, when their policies were actually practiced, the nature and ideological structure of their mass lines became differentiated from each other, as pointed out in the above, as dictated by the circumstances which prevailed in their respective

scenes. In other words, the courses their government authorities took in seizing power were different from each other; the positions in their parties of those who advocated the mass lines were different from each other; the residues of bureaucracy in those two countries were different from each other; and the sizes of their territorial areas were different from each other. Then I tried to attest that the mass lines of Communist China and North Korea could not help taking respectively unique ideological structures of their own.

While the mass line of Communist China was the so-called "the mass line from below," in which information was gathered from the masses, the policies were developed, and then tested among the masses. In the case of North Korea, the party developed the policies first, paraphrased and publicized them among the masses to get more participation--thus its mass lines developed as the so-called "the mass line from above." Such mass lines are still being employed by Communist China and North Korea as a method of guiding the masses, it seems.

Meanwhile, it seems to be a recent trend that the mass lines are being employed not as measures to promote modernization but as measures to deal with the problem of legitimacy of the governmental power. For example, the great Cultural Revolution of Communist China, too, was characterized as Mao Zedong's movement aimed at rehabilitating the party's power on the basis of the mass line; and, the criticize Lin Biao Movement and the criticize Kongzi movement, which were said to eliminate bureaucracy and revisionism, were also, in fact, the works of purge based on the mass line, it may be noted. In North Korea also, the mass line was developed in a direction where the initiatives and creativeness of the masses could be enhanced and technology be improved under the slogans of "Ch'ongsan-ni method" or "the Tae'an Work style"; and, furthermore, the mass line is being used as a factor in formulating the system of hereditary succession between Kim Il-song and Kim Chong-il, by means of Kim Il-song's "on-the-spot guidance" and Kim Chong-il's "administrative guidance."

Finally, the remaining question is how long will the mass lines, which were adopted as measures to promote modernization fundamentally by means ideology-inciting, serve as "a function conforming" measure?

25. Liu Shaoqi and Deng Xiaoping were opposed to the so-called "sanmian hongqi" policies [policies designed to effect such conditions which fitted the implementation of socialist construction in the three fields--production, technology, and ideology]--"overall policies of socialist construction" "the Great Leap Movement," and "the people's communes," criticizing them for being drastic measures mapped without consideration of the economic aspects. Later, when the Great Leap Movement failed and the biggest part of the government power was turned over to Liu Shaoqi--this was attributed to the mistakes committed in implementing economic policies. And this failure gave rise to the great Cultural Revolution, as the prevailing theory goes.

BRIEFS

TUNNELING GEAR CAUSES CONCERN--Hong Kong (Yonhap)--A military analyst expressed worry yesterday that North Korea's use of the Soviet-made "precision" tunneling equipment as captured by Israeli troops from the Palestine Liberation Organization (PLO) recently, in digging underground passages over the Demilitarized Zone (DMZ) would bring about a "horrendous" effect on the military situation on the Korean peninsula. The analyst said that the Russian-made tunneling device Israeli troops had captured from PLO members in Sidon south of Beirut are such that they could dig a 50-km tunnel in just two days' time. The Communist regime of North Korea previously brought in tunneling gear for mining from Austria and other European countries to build underground passages over the DMZ. INFORMATION ON NORTH KOREAN INDUSTRIAL FACILITIES

[The following information on North Korean factories, mines, and other Industrial facilities has been extracted from Korean language sources published in Pyongyang. The following abbreviations are used in the sourceline:
NS = NODONG SINMUN; MC = MINJU CHOSON; NC = NODONG CH'ONGNYON.]

Tae'an Heavy Machinery Factory

workers and three revolutions team members innovated in production of large transformers, motors, and special large exhaust fans and is sending them to chemical plant construction sites; setting new records in production of large hydroelectric generators and turbines to be sent to power station construction stations; functionaries are getting workers to use equipment to the maximum through good political work [NS 3 Sep 81 p 1]

Ch'ongch'ongang Power Station

getting reserve parts for three maintenance levels and organizing for planned reserve maintenance; maintenance sector workers and technicians prepared parts and tools for concentrated maintenance on turbines and are finishing the maintenance period 10 days early; the 15 April technical innovations shock brigade reorganized the high pressure heaters to raise heat efficiency [NS 3 Sep 81 p 3]

Sungni Vehicle Complex

solved problems in the materiel sector, including casting, cast steel, and forging, so that these sectors exceeded daily plans; in solving the question of half-shaft cases, an important part, workers and technicians created new tools and implements, including a board drill [NS 4 Sep 81 p 1]

8 August Factory

raised the level of conversion to dies 22 percent and to press 17 percent, compared with the same period last year; got 10 pieces of equipment to save several hundred tons of steel and thousands of man-days of labor; with the 15 April technical

innovations shock brigade, made various equipment, including a 300-ton extruding press, and are finishing a 1,000-ton extruding press and a 25-ton high-speed hammer [NS 6 Sep 81 p 1]

8 August Mine

has many confirmed deposits and in the second half of the year concentrated on the Youth Pit, which had advanced excavating conditions: installed new, large air compressors in a few days and raised the number of rock drills; with better handling and inspection of equipment in the concentrate area, the daily average concentrate handling amounts jumped 43 percent, compared with the first half of the year [NS 7 Sep 81 p 1]

Sinuiju Chemical Fiber
Factory

finishing maintenance on the synthetic fiber equipment; performed maintenance and refurbished boilers instead of making another 30-ton boiler; reorganized more rationally the pulverization system; in solving the caustic soda problem, the 15 April technical innovations shock brigade reorganized technically the roasting furnace process [NS 8 Sep 81 p 1]

Pyongyang Electric Light
Bulb Factory

in September, raised production of fluorescent lights 1.3 times, light bulbs 1.5 times, and special light bulbs 1.4 times, compared with the previous month; the fluorescent light shop setting new records in assembly through good equipment maintenance and improvement of worker skill levels; operators of the light bulb automation line in the youth light bulb shop set high combat goals and are normalizing high levels of production [NS 10 Sep 81 p 1]

Inp'yong Mine

tunnellers blast efficiency raised 95 percent and they raised the number of blasts per shift, thus increasing productivity 1.2 times; miners performing spot inspections on equipment in mines and shops, while workers are innovating in maintenance and management of equipment in the concentrate yard, greatly raising recovery rates [NS 11 Sep 81 p 1]

P'angyo Mine

exceeding plans more than 20 percent daily, while miners, raising extraction speed, are exceeding ore production quotas better than 50 percent every day; transport equipment has been increased and plans established to raise the mechanization level [NS 13 Sep 81 p 1]

Hamhung Tractor
Parts Factory

casting work team reorganized its casting method and doubled materials cutting work speed; a 15 April technical innovations shock brigade and workers of the 1st manufacturing shop innovated in gear manufacturing; they innovated in recycling 600-odd gears which could not be used in gear compressors; the 2d manufacturing shop adopted various grinding tools and is exceeding parts production plans 1.5 times daily [NS 14 Sep 81 p 2]

Namp'o Smeltery

finished foundation work for installing large-size electric ovens, electric blast furnaces and special large ventilators, which will double present production capacity of the system; maintenance on the sintering system was accomplished in a short time and workers are finishing maintenance on the fertilizer system [NS 16 Sep 81 p 1]

Nagyon Mine

miners and three revolutions team members raised the concentrate capacity 2.5 times in a short time and tripled ore transport capacity by new construction of an underground loop line tram shaft; block handling went from 40 ore cars per day to 70 per day [NS 18 Sep 81 p 1]

Hoch'ongang Power Station

produced 2 million kw/hours more power than planned every day by running equipment fully due to good equipment maintenance; the No 1 and 2 generator shops established a reserve maintenance system; the electric shop rationalized the number of circumference wires in generators and greatly increased generator efficiency [MC 23 Sep 81 p 1]

Ongjin Mine

set up a thorough system for equipment inspection, evaluation, and maintenance; transport companies completely restored old crushers and developed consolidated oil dispensing equipment [NS 25 Sep 81 p 3]

Pukch'ang Power Station

workers and volunteers finished construction of the No 13 generator and power production has begun; power base construction workers and volunteers are raising speed on generator No 14 [MC 26 Sep 81 p 1]

Kumsong Tractor Factory

of 1,200 draft innovations, 1,000 were realized with the assistance of a 15 April technical innovations shock brigade; made a large-size high-speed hammer and a new starter [NS 27 Sep 81 p 3]

CSO: 4108/173

BRIEFS

FLOOD GATE CONSTRUCTION--Youth construction workers are making good progress on the Maekjon Flood Gate, which is to be more modern in design and operation than previous gates. They have already finished the upper section and are setting new records in the lower section. Workers are exceeding plans in lower anchorage cement pouring and gate area excavation. [Pyongyang NODONG SINMUN in Korean 2 Sep 81 p 3]

SHIP REPAIR SUCCESSES--Ship repair plans have established a 15-day ship repair system, involving good preparation and daily combat targets, particularly to aid fishing. The Tanch'on Ship Repair Plant has taken the lead in ship repair: it has been achieving plans without fail by establishing an assembly-line method for repair work. The Wonsan Ship Repair Plant is guaranteeing quality work through close contact with fishing stations. The Sinp'o Fishery is completing construction on dock bridge, which will be able to moor ships in a short time, and on a fish unloading area; workers have completed concrete columns and are exceeding plans in conveyer assembly for a fish transport conveyer. [Pyongyang MINJU CHOSON in Korean 20 Sep 81 p 1]

NORTH HWANGHAE MINES--In the second half of the year, nonferrous mines in North Hwanghae Province are raising daily average ore production results, compared with the first half. Pits at the 8 November Mine have raised utilization rates for excavators and large trucks, performing good repair on them. Functionaries going to the Manmyon Mine have emphasized preparatory tunneling and aided in planning more excavation areas; the mine has improved transport and some pits have increased the number of rock drills. Functionaries who went to the P'yongsan Mine are striving to get a high production level. [Pyongyang NODONG SINMUN in Korean 22 Sep 81 p 1]

INNOVATIONS AT COLLIERIES--15 April Technical Innovation Shock Brigades in South P'yongan Province have aided innovations at the coal mining complexes at Sunch'on and Tokch'on. At the Yongdae and Choyang Coal Mines, brigades made new high-efficiency excavators, which have more than doubled excavations speed while conserving timbers and eliminating hand labor at shaft ends. Brigades at the Ch'ongsong Youth Coal Mine got adoption of innovations in anthracite excavation. Teams at the Sinch'ang, Namjon, Tokch'on and Yongnim Coal Mines fostered hundreds of innovations, including new blasting methods, electric excavation, and double bit drock drill cars. Brigades at the Choyang Coal Mine made shielded coal cutters, with which one company more than tripled coal cutting. [Pyongyang NODONG SINMUN in Korean 22 Sep 81 p 1]

SMALL-MEDIUM POWER STATIONS--Small-medium power stations in North Hamgyong Province raised power production amounts more than 1.5 times, compared to monthly average results at the same time last year. The Kwanhae Power Station has already finished the year's power production plan; the power station had good maintenance on the water gate and adopted new technology for efficient use of water. The Songhung and Ch'anghyo Power Stations, through good spot inspection and maintenance of equipment, have already finished their year's plans.
[Pyongyang MINJU CHOSON in Korean 27 Sep 81 p 3]

N. KOREA/FOREIGN RELATIONS

KIM IL-SONG'S UPCOMING VISIT TO BEIJING

Seoul TONG-A ILBO in Korean 15 Jul 82 p 2

[Article by Chon Hak-ch'ol: "Pro-PRC Line Chosen by North Korea"]

[Summary] Kim Il-song's visit to the PRC in August or early September should be regarded as a plan established because of the mutual needs of Pyongyang and Beijing. The most pressing problem at issue in North Korea concerns whether or not Kim's hereditary power transfer to his son Kim Chong-il can be successful. The PRC had shown a cold reaction to Kim Chong-il's succession to power.

The PRC reduced its crude oil supply to North Korea from the promised 1 million tons to 300,000 tons a year. The PRC has also been negligent on economic aid to North Korea for its modernization programs. Moreover, in its strategy toward the Soviet Union, the PRC secretly hopes for the continued presence of American troops in Korea. With the growing indirect South Korean trade through Hong Kong, the PRC had been frigid in its relations with North Korea up until the fall of 1981.

Their turning point came last December when PRC Premier Chao Tzu-yang visited Pyongyang. During his visit, Chao reportedly gave a commitment that the PRC would not be opposed to the hereditary power plan. Beijing is again ready to increase its crude oil supply to 1 million tons and supply PRC-made A-5 fighter planes (comparable to Russian-made MIG-21's).

Last January, North Korean Premier Yi Chong-ok visited Beijing and reconfirmed Chao's verbal commitment. While attending the 70th birthday party for Kim Il-song held at the North Korean Embassy in Beijing last April, PRC Premier Chao openly voiced his support of the hereditary power plan.

PRC Defense Minister Keng Piao, during his recent visit to Pyongyang, also showed a supporting attitude of the North Korean hereditary plan during a meeting on the PRC's supply of fighter aircraft.

The PRC is now exposed to military threats by Vietnam on its southwestern borders and by the Soviets on its northern borders. In view of such, North Korea's strategic value to Beijing is considered almost absolute. It is a top priority task for the PRC to check North Korea's tilt toward the Soviet Union. Moreover, Kim Chong-il is considered more pro-Moscow than his father which makes it necessary for the PRC to develop pacification work to bring Kim Chong-il over to Beijing. The PRC also wants to use Ch'ongjin port for export of its farm products from Manchuria to Japan. In view of all this they are increasing their military and economic aid to North Korea, which may goad North Korea into provocations against the south.

Kim Il-song is scheduled to visit Beijing in August or early September and then to continue on to other communist and non-communist nations, according to wire dispatches. It seems that North Korea is turning toward Beijing at least temporarily for some realistic interests.

APPEARANCE LISTS FOR DPRK PERSONALITIES

[The following lists of DPRK government and KWP officials have been extracted from Korean language sources published in Pyongyang. Order and titles of the original source have been preserved, but names have been presented in tabular form for ease of recognition.]

KIM CONFERS WITH AFRICANS--On 31 August, Kim Il-song met and conferred with ministers of agriculture from African nations who are attending the Nonaligned Conference on Foodstuffs and Agricultural Development; the following were also present:

Kim Yŏng-nam	comrade
Kim Hwan	"
Hŏ Tam	"
Kong Chin-t'ae	"
Sŏ Kwan-hi	"
Pyŏn Ch'ang-pok	functionary of the department concerned
Yŏm [Ryŏm] Ŭi-chae	"
Kim Chae-pong	"
Kim Ch'ung-il	"
Yi Yŏng-kyun	"

[NODONG SINMUN 1 Sep 81 p 1]

KIM MEETS DELEGATES--On 31 August, Kim Il'song met foreign delegations which came to the DPRK to attend the Nonaligned Nations Conference on Foodstuffs and Agricultural Development; the following also were present:

DELEGATIONS FROM BENIN, EQUATORIAL GUINEA, AND LIBERIA:

Hŏ Tam	vice premier, foreign minister
Sŏ Kwan-hi	vice premier, chairman, agriculture committee

DELEGATIONS FROM SIERRA LEONE, SEYCHELLES, AND ZAIRE:

Sŏ Kwan-hi vice premier; chairman, agriculture committee
Kim Chae-pong vice foreign minister

DELEGATIONS FROM SRI LANKA AND AFGHANISTAN

Chŏng Chun-ki vice premier
Kim Chae-pong vice foreign minister

[NODONG SINMUN 1 Sep 81 pp 1-4]

NONALIGNED DAY MARKED--The following attended a Pyongyang city report rally on 31 August at the 8 February Cultural Hall to celebrate Nonaligned Conference Day:

Pak Sŏng-ch'ŏl member, politburo; vice president
Kye Ŭng-t'ae member, politburo; vice premier
Hŏ Tam candidate member, politburo; vice premier; foreign minister
Chŏng Chun-ki candidate member, politburo; vice premier
Sŏ Kwan-hi member, central committee; vice premier; chairman, agricultural committee
Kim Kyŏng-yŏn [ryŏn] member, central committee; vice premier
Kim Kwan-sŏp functionary of the department concerned
Kim Man-kŭm "
Yi Yŏng-kyun "
Kim Ch'ung-il "

[NODONG SINMUN 1 Sep 81 p 5]

NIGHT MEETING HELD--A night meeting was held at Kim Il-song Square on 31 August, with the following attending:

Kye Ŭng-t'ae vice premier
Sŏ Kwan-hi vice premier; chairman, agriculture committee
Kim Kwan-sŏp functionary of the department concerned
Kim Man-kŭm "
Yi Yŏng-kyun "
Kim Ch'ung-il "

[NODONG SINMUN 1 Sep 81 p 11]

GERMAN SOCIALISTS DEPART--The following bid farewell to the German Social Democratic Party delegation, which departed by airplane on 1 September:

Kim Yŏng-nam	member, politburo; secretary, central committee
Kim Yong-sun	member, central committee; vice chairman, central committee

[NODONG SINMUN 2 Sep 81 p 3]

NONALIGNED DAY CELEBRATED--A meeting to celebrate Nonaligned Conference Day was held with foreign guests at Daesongsan Park in Pyongyang on 1 September with the following attending:

Pak Sŏng-ch'ŏl	vice president
Chŏng Chun-ki	vice premier
Sŏ Kwan-hi	vice premier; chairman, agriculture committee
Kim Kwan-sŏp	functionary of the department concerned
Kim Man-kŭm	"
An Sŭng-hak	"
Yi Yŏng-kyun	"
Kim Ch'ung-il	"

[NODONG SINMUN 2 Sep 81 p 4]

MEXICAN DANCERS PERFORM--The following attended the premier performance of the Mexican Folk Dance Troupe at the 8 February Cultural Hall on 1 September:

Chang Ch'ŏl	functionary of the department concerned
Chang' Se-kŭk	"
Ch'oe Yŏng-hwa	"

[NODONG SINMUN 2 Sep 81 p 5]

TRADE DELEGATION RETURNS--The following greeted the 2 September return of the government trade delegation, led by Ch'oe Chong-kun, which visited Syria and Algeria:

Pang Ch'ŏl-kap	functionary of the department concerned
Yi Yŏng-kŭn	"

[NODONG SINMUN 3 Sep 81 p 4]

CHONGNYON DELEGATIONS ARRIVE--The following Chongnyon delegations arrived in Pyongyang on 1 September: Chongyon printing functionaries delegation, led by Pu Yun-sin, vice bureau chief of the CHOSON SINBO Company; Chongnyon Film Distribution Functionaries delegation, led by Yŏ [Ryŏ] Unkak, vice director, Chongnyon Film Studies; Korea University graduate department students

delegation, led by Yi Sŏk-pong, chairman, Korea University Teachers Education Department. The following greeted their arrival:

Hŏ Chŏng-suk	functionary of the department concerned
Kim Chu-yŏng	"
Kim Hyŏng-tŭk	"
Hyŏn Sŏk	"
Kim Ch'ang-hak	"
Wang Kyŏng-hak	"

[NODONG SINMUN 3 Sep 81 p 5]

CHONGNYON WELCOME RALLY--A workers meeting to welcome the visiting Chongnyon delegations was held at the Central Workers Hall on 3 September, with the following attending:

Chŏng Chun-ki	vice premier
Kim Ki-nam	functionary of the department concerned
Hŏ Chŏng-suk	"
Kim Chu-yŏng	"
Yi Chae-kwan	"

[NODONG SINMUN 4 Sep 81 p 5]

CONGRATULATORY DELEGATION ARRIVES--The following greeted the arrival on 4 September of the Korean Residents of Japan Congratulatory Delegation, led by Yi Kyue-paek, vice chairman of the Chongnyon central standing committee:

Kim Chung-nin [rin]	comrade
Chŏng-Chun-ki	"
So Yun-sŏk	"
Kim Man-kŭm	functionary of the department concerned
Kim Chu-yŏng	"

[NODONG SINMUN 5 Sep 81 p 3]

INDONESIAN GOVERNMENT DELEGATION--An Indonesian government delegation, led by Foreign Minister Kusumaatmadja Mochtar, arrived on 5 September, with the following to greet them:

Hŏ Tam	vice premier, foreign minister
Ch'oe Chŏng-kŭn	minister of foreign trade
Cho Kyu-il	vice foreign minister

[NODONG SINMUN 6 Sep 81 p 2]

PHYSICAL STRENGTH EXAMINATIONS--A central inauguration ceremony for the 1981 people's strength examinations was held on 6 September in the Central Workers Hall with the following present:

Chŏng Chun-ki	comrade
Hwang Chang-yŏp	"
Pak Su-tong	"
Chang Yun-p'il	functionary of the department concerned
Kim Pong-chu	"
Yi Yŏng-su	"

[NODONG SINMUN 7 Sep 81 p 4]

KIM MEETS VENEZUELAN--On 7 September, Kim Il-song met the visiting Venezuelan Socialist Labor Movement delegation, with the following also present:

Kim Yŏng-nam	member, politburo; secretary, central committee
Hyŏn Chun-kŭk	member, vice chairman, central committee

[NODONG SINMUN 8 Sep 81 p 1]

RETURN FROM SYRIA--The following greeted the return of the party and government delegation, led by Yi Chong-ok, which returned from Syria on 7 September:

Pak Sŏng-ch'ŏl	comrade
Kang Sŏng-san	"
Ch'oe Chŏng-kŭn	functionary of the department concerned
Kim Yong-sun	"
Kim Chae-suk	"
Yi Yong [Ryong]-un	"

[NODONG SINMUN 8 Sep 81 p 2]

PUBLISHERS' ANNIVERSARY MARKED--The following attended a report meeting on the 35th anniversary of the founding of the Literature and Arts Publishing Company, held on 7 September at the Moranbong Art Theater:

Hwang Chang-yŏp	comrade
Ch'ŏn Se-pong	functionary of the department concerned
Sin Chin-sun	"
Ch'oe Yŏng-hwa	"
Cho Yŏng [Ryŏng]-ch'ul	"

[NODONG SINMUN 8 Sep 81 p 4]

BULGARIAN ANNIVERSARY CELEBRATED--The following attended a meeting on the 70th birthday of Bulgaria's Todor Zhivkov, held on the 7th at the Moranbong Art Theater:

Kye Ŭng-t'ae	vice premier
Kim Kwan-sŏp	functionary of the department concerned
Kim Man-kŭm	"
Yi Chong-mok	"
Yun Ki-chŏng	"
Kil Chae-kyŏng	"
Chang Ch'ŏl	"

[NODONG SINMUN 8 Sep 81 p 4]

FINNISH DELEGATION ARRIVES--A Finland Solidary on Korean Unification delegation, composed of various parties from the Finnish Parliament arrived on 7 September, with the following to greet them:

Kim Yong-sun	functionary of the department concerned
Son Sŏng-p'il	"

[NODONG SINMUN 8 Sep 81 p 4]

MPAF FILM SHOW--The Ministry of the People's Armed Forces held a film showing on 7 September on the 33d anniversary of the founding of the DPRK, with the following present:

Pak Chung-kuk	lieutenant general
Kim Kwang-chin	"

[NODONG SINMUN 8 Sep 81 p 5]

BULGARIAN FRIENDSHIP DELEGATION--The following greeted the 7 September arrival of the delegation of the DPRK-Bulgaria Friendship Society:

Chang Ch'ŏl	functionary of the department concerned
O Mun-han	"
Kim Won-chin	"

[NODONG SINMUN 8 Sep 81 p 5]

RALLY FOR MALAGASY--The following participated in a mass rally at the Chollima Cultural Hall on 7 September to welcome the Malagasy public information delegation:

Kim Kwan-sŏp	functionary of the department concerned
O Mun-han	"

Song Pong-sun functionary of the department concerned

Kim Kwang-su "

[NODONG SINMUN 8 Sep 81 p 6]

DPRK 33d ANNIVERSARY--The following attended a central report meeting on 8 September at the People's Cultural Palace on the occasion of the 33d anniversary of the founding of the DPRK:

O Chin-u	member, politburo standing committee; minister of people's armed forces
Yi Chong-ok	member, politburo standing committee; premier
Pak Sŏng-ch'ŏl	member, politburo; vice president
Yim Ch'un-ch'u	member, politburo; chief secretary, central committee
Sŏ Ch'ŏl	member, politburo; chairman, auditing committee
Kim Chung-nin [rin]	member, politburo; secretary, central committee
Kim Yŏng-nam	"
Kye Ŭng-t'ae	member, politburo; vice premier
Kang Sŏng-san	"
Paek Hak-nim [rim]	member, politburo; vice minister of people's armed forces
Hŏ Tam	candidate member, politburo; vice premier
Yun Ki-pok	candidate member, politburo; secretary, central committee
Ch'oe Kwang	candidate member, politburo; vice premier
Kim Ch'ŏl-man	candidate member, politburo
Ch'oe Chae-u	candidate member, politburo; vice premier
Kong Chin-t'ae	"
Chŏng Chun-ki	"
Sŏ Yun-sŏk	candidate member, politburo; responsible secretary, Pyongyang city party
Hwang Chang-yŏp	secretary, central committee; chairman, SPA standing committee
Pak Su-tong	secretary, central committee
Hong Si-hak	vice premier
Sŏ Kwan-hi	comrade
Kim Tu-yŏng	"
Kim Kyŏng-yŏn [ryŏn]	"
Kim Hoe-il	"

Chông Sin-hyok chairman, Chongdogyo Ch'ong-u Party central committee

Kim Man-kûm chairman, Pyongyang city people's committee

[NODONG SINMUN 9 Sep 81 p 2]

LETTER OF APPRECIATION--The following attended a meeting on-the-spot when a letter of appreciation was passed to workers at the South Hamgyong Province Dental Clinic construction site, on 8 September:

Yi Kil-song functionary of the department concerned

Yôm [Ryôm] T'ae-chun "

Kim Hyông-chông "

[NODONG SINMUN 10 Sep 81 p 1]

ATHLETIC EXHIBITION HELD--The following attended the mass athletic exhibition "Following the flag of independence," held on the afternoon of the 9th at the Moranbong Stadium:

Pak Sông-ch'ôl comrade

Kim Chung-nin [rin] "

Kim Yông-nam "

Hô Tam "

Yun Ki-pok "

Kong Chin-t'ae "

Chông Chun-ki "

Sô Yun-sôk "

[NODONG SINMUN 10 Sep 81 p 4]

SOIREE HELD--A soiree of Pyongyang workers marking the 33d anniversary of the founding of the DPRK was held in Kim Il-song Plaza on 9 September, with the following present:

Pak Sông-ch'ôl comrade

Kim Chung-nin [rin] "

Kim Yông-nam "
